

## FOR IMMEDIATE RELEASE

## NATIONWIDE BOILER INC. SIGNS THREE NEW REPRESENTATIVE AGREEMENTS

**Fremont, California, November 20, 2012**.....Nationwide Boiler Inc. continues to gain worldwide presence and representation by signing three new representative agreements with Campbell-Sevey in Minnetonka, MN, Illingworth Engineering Co. in Jacksonville, FL, and Gates Technology International (GTI) in Tulsa, OK. This is in addition to the seven newly signed representatives that Nationwide Boiler has gained this year, with the assistance of Business Development Manager, William Testa.

Both Campbell-Sevey and Illingworth Engineering Co. have a history representing Nationwide Boiler in the past, but the newly signed agreements draw out exclusive territories of representation for the two companies. Campbell-Sevey's exclusive territories include South Dakota, North Dakota, Minnesota, and counties in Wisconsin, while Illingworth Engineering will be representing Nationwide Boiler in parts of both Florida and Georgia. Combined, the two companies have over one hundred and forty-five years of industry experience and expertise providing boilers and boiler related equipment to their customers. Like Nationwide Boiler, both companies are committed to providing excellent customer service and value to their customers. Visit www.campbell-sevey.com and www.boiler.net to obtain more information and products offered by Campbell-Sevey and Illingworth Engineering Co.

Jack Gates, founder of Gates Technology International, is an independent consultant to the petrochemical and refinery markets with technical expertise in fired heater equipment and

heat transfer. GTI recently secured their first CataStak<sup>™</sup> Selective Catalytic Reduction (SCR) system sale for a fired heater application located in Texas. With over forty years of industry experience, Jack Gates is considered a resident expert in the field, and he consults to most of the major fired heater manufacturers, specifically in Israel and the Middle East, on a variety of technical issues focused mainly on environmental emissions. GTI will be assisting Nationwide Boiler by providing key strategic initiatives regarding the application of CataStak<sup>™</sup> environmental solutions.

Nationwide Boiler Inc. offers a complete line of low NOx rental boilers, mobile boiler rooms, CataStak<sup>™</sup> SCR systems for 2½ ppm NOx compliance, EconoStak economizers for fuel efficiency, and auxiliary boiler equipment for rental, short- or long-term, seasonal, emergency use, or for sale and turnkey steam plant projects. The firm's national headquarters are in Fremont, California with sales and service agents throughout the world.
