

FOR IMMEDIATE RELEASE

**100,000 LB/HR BOILERS ADDED TO NATIONWIDE BOILER'S
COMPREHENSIVE FLEET OF RENTAL BOILERS**

Fremont, California, January 8, 2021..... With a fleet of over 100 rental boilers and related equipment, Nationwide Boiler continues to expand their inventory with the addition of three (3) 100,000 lb/hr Superior trailer-mounted package watertube boilers. Two of the boilers are already built and available for service, while the third unit of this size and design is now in production at the manufacturing facility in Hutchison, KS. This adds to the company's already extensive fleet of package firetube and watertube mobile rental boiler systems, stored in eight different storage and maintenance facilities across North America.

The new 100,000 lb/hr package watertube boilers are designed at 399 psig for saturated steam production. They can be operated at 99.9MMBTUH for a reduced capacity of 82,500 lb/hr, or, if 30 ppm low NOx emissions are required. At full capacity, units can be supplied with a CataStak™ SCR system for ultra-low NOx emissions of 5 ppm or less.

For nearly 55 years, Nationwide Boiler Inc. has provided reliable temporary boiler systems to industrial customers across the globe. The company also offers new and reconditioned boilers for sale, custom PLC-based combustion control systems and fuel trains, and emissions control with the CataStak™ SCR system for boilers, fired heaters, gas turbines, and other fired equipment applications. For more information, visit www.nationwideboiler.com.
